Mendeleev Chemical Society

4<sup>th</sup> International symposium dedicated to the 100<sup>th</sup> anniversary of academician Mark Vol'pin

23-27 May 2023

INEOS RAS, Moscow, Russia

Professor Mark E. Vol'pin 23.05.1923 – 28.09.1996

The day of May 23 2023 is the 100th anniversary of the birth of Mark Efimovich Vol'pin, chemist of genius and one of Russia's leading scientists.

Mark Efimovitch Vol'pin started his career as an organic chemist, then moved into organometallic chemistry, and ended it in bioinorganic chemistry. From 1988 he was the director of the A.N. Nesmeyanov Institute of Organoelement Compounds (INEOS) of the Russian Academy of Sciences.

Vol'pin came from a medical background but, after service during the Second World War, he graduated in Chemistry from Moscow State University in 1949. He first became well-known in the mid-1950s for his studies on the chemistry of tropylium, a remarkable organic compound with seven carbons in a ring, bearing a positive charge, which was isolable due to its 6-electron "aromatic" character. He later expanded the chemistry of such organic positively charged ions to the 3-membered ring, 2-electron analogues. For that work he was awarded the Lenin Prize in 1963. Deriving from this he became interested in the highly reactive unsaturated single carbon species called carbenes, which in turn led him to investigate related systems, including some highly reactive and unsaturated metal complexes. The successful synthesis of diphenylcyclopropenone via the reaction of dihalocarbenes with tolane led Vol'pin to very important theoretical generalizations for the concept of "carbenoids", heteroanalogs of carbenes (R<sub>2</sub>Ge, R<sub>2</sub>Sn, RB).

An interesting sidelight on the path of pure scientific research in the hands of a master like Vol'pin is seen in his progression from organic chemistry to a most remarkable discovery in inorganic chemistry: a metal complex with the ability to "fix" atmospheric nitrogen under very mild conditions. The catalytic system that Vol'pin and V.B. Shur developed offered a signpost to many other workers. For this research Vol'pin was awarded the USSR State Prize in 1982, as well as numerous other honours, and was elected to full membership of the USSR Academy of Science in 1987.

In his later work he studied biological metal complexes that could generate very active species, in this case free radicals. The object of these researches was to find compounds that were absorbed by tumours and would destroy them without harming healthy tissue. He felt that this work represented his most satisfying achievement.

In his later career he was the intellectual powerhouse that drove the research staff of INEOS by example and inspiration. Characteristically he ran a relatively small group himself and did not have his name on all the Institute publications, as was the custom elsewhere. He was a very approachable, gentle and nice man; and he was appointed Director on three separate occasions. Vol'pin was a tall youthful-looking man with a ready smile. He was a most convivial companion, and much enjoyed entertaining friends and visitors.

Adopted from Prof. Peter Maitlis, The Independent. 24 October 1996.

Dear colleague,

The Organizing Committee cordially invites you to participate in the

4th International symposium "Modern trends in organometallic chemistry and

catalysis" dedicated to the 100th anniversary of the academician M. E. Vol'pin, who

was one of the eminent Russian chemists of XXth century and served as the INEOS

Director in 1988-1996.

The symposium will be held at the A.N. Nesmeyanov Institute of

Organoelement Compounds of the Russian Academy of Sciences (Moscow, Russia)

on May 23-27, 2023.

**Scientific Program** 

The major topics of the Symposium are

• Organometallic Chemistry

• Catalysis by Metal Complexes

Bioinorganic Chemistry

Materials

The Symposium Program will include plenary (30 min) and invited (20 min)

lectures, oral contributions (15 min) and poster presentations.

The official symposium languages are **English and Russian**.

**Key Deadlines** 

Oral abstract submission

31 March 2023

Poster abstract submission

7 April 2023

Standard registration

12 May 2023

## **Organizing Committee**

Trifonov Alexander A. Chair Belkova, Natalia V. Vice chair

Aldoshin, Sergey M.

Ananikov, Valentin P.

Antipin, Igor S

Koifman, Oskar I.

Konchenko, Sergey N.

Bachurin, Sergei O.

Kuchin Alexander V.

Bachurin, Sergei O.

Beletskaya, Irina P.

Kukushkin, Vadim Yu.

Belokon, Yuri N.

Maksimov Anton L.

Bregadze, Vladimir I.

Minkin, Vladimir I.

Brylev, Konstantin A.

Mironov, Vladimir F.

Bukhtiyarov, Valery I.

Muzafarov, Aziz M.

Osipov, Sergey N.

Eremenko, Igor L. Ponomarenko, Sergey A

Fedin, Vladimir P. Shubina, Elena S.
Fedushkin, Igor L. Sinyashin, Oleg G.
Filippov, Oleg A. Storozhenko, Pavel A.
Gorbunova, Yulia G. Ustynyuk, Nikolai A.
Ivanov, Vladimir K. Zhizhin Konstantin Yu.

Kalmykov, Stepan N.

# **Local Organizing Committee**

Belkova, Natalia V. chair Korlyukov, Alexander A.

Belokon, Yuri N.

Bilyachenko, Alexei N.

Bregadze, Vladimir I.

Burlakov Vladimir V.

Larionov, Vladimir A.

Loginov, Dmitry A.

Maleev, Victor I.

Muratov, Dmitry V.

Chusov, Denis A. Perekalin, Dmitry S. Fedorova, Olga A. Shubina, Elena S. Filippov, Oleg A. Sivaev Igor B.

Kalsin, Alexander M. Zarubin, Dmitrii N.

# **Programm Committee**

Osipov, Sergei N.- chair Filippov, Oleg A.

Belokon, Yuri N. Shubina, Elena S.

Bregadze, Vladimir I. Perekalin, Dmitry S.

Burlakov Vladimir V.

## Symposium venue

The Symposium will be held at the A.N. Nesmeyanov Institute of Organoelement Compounds of the Russian Academy of Sciences, Vavilova St. 28, bld. 1., Moscow.

## **Sponsors**

There is a number of sponsorship and exhibition opportunities available at the symposium, including sponsorship of social events, advertisements in the book of abstracts, table top exhibitions and presentations. Please contact symposium secretary for further information.
