GENERAL INFORMATION

Dear colleagues,

The Organizing Committee cordially invites you to participate in The Russian Conference "Chemistry of Organoelement Compounds: Results and Prospects". The Conference is devoted to 110th anniversary of an outstanding chemist Professor A.N. Nesmeyanov who has founded the worldwide known Russian school of organoelement chemists. The Scientific Programme of the Conference will comprise important aspects of the chemistry of organoelement compounds, technology and applications that will be of priority interest within the next 10 to 15 years.

The scientists working in the field of chemistry of organoelement compounds are invited to take part in the Conference.

The Conference will be held at A.N. Nesmeyanov Institute of Organoelement Compounds of the Russian Academy of Sciences (Moscow, Russia) from the 28th of September till the 2d of October 2009.

MAIN SCIENTIFIC DIRECTIONS OF THE CONFERENCE

- **Synthesis and reactivity of organoelement compounds**
- **Structure and properties of organoelement compounds**
- **Practice and prospects of applications of organoelement compounds to various fields of science and engineering**

The Organizing Committee will organize the work of two parallel streams of presentations:

- **Section A**, whose Programme covers a wide circle of problems related to various directions of development of chemistry of organoelement compounds;
- **Section B**, which is the International Symposium "Organometallics in Catalysis, Environment and Life Sciences", organized within the framework of the Conference.

The Scientific Programme of the Conference will include plenary lectures (duration 30 min) given by the leading Russian and foreign scientists invited by the Organizing Committee, oral presentations (duration 15 min) and poster presentations of young scientists (age of 35 years or less).

It is planned that the 1st of October 2009 will be the day when only young scientists (age of 35 years or less) will make their oral presentations in English.
