

**Избранные публикации официального оппонента Алентьева Дмитрия
Александровича по тематике защищаемой диссертации**

1. **Alentiev, D. A.** Polynorbornenes bearing ether fragments in substituents: Promising membrane materials with enhanced CO₂ permeability / **D. A. Alentiev**, R. Y. Nikiforov, M. A. Rudakova et al. // Journal of Membrane Science. — 2022. — V. 648. — P. 120340.
2. Kanateva, A. Y. Chromatographic method for evaluation of polymeric gc stationary phases ageing using the novel non-cross-linked poly(3-(tributoxysilyl)tricyclononene-7) as the model stationary phase / A. Y. Kanateva, M. V. Bermeshev, **D. A. Alentiev** et al. // Polymers. — 2021. — V. 13.— № 11. — P. 1899–1899.
3. **Alentiev, D. A.** Design and synthesis of porous organic polymeric materials from norbornene derivatives / **Alentiev D. A.**, Bermeshev M. V. // Polymer Reviews. — 2021. — P. 400-437.
4. Guseva, M. A. Polymers based on exo-silicon-substituted norbornenes for membrane gas separation / M. A. Guseva, **D. A. Alentiev**, D. S. Bakhtin et al. // Journal of Membrane Science. — 2021. — V. 638. — P. 119656.
5. Karpov, G. O. Dielectric properties of addition and metathesis polynorbornenes with bulky side-substituents / G. O. Karpov, **D. A. Alentiev**, A. I. Wozniak et al. // Polymer. — 2020. — V. 203. — P. 122759.
6. **Alentiev, D. A.** Crosslinking of addition copolymers from tricyclononenes bearing (CH₃)₃Si- and (C₂H₅O)₃Si-groups as a modification of membrane gas separation materials / **D. A. Alentiev**, E. S. Egorova, M. V. Bermeshev et al. // Polymer Engineering and Science. — 2019.— V. 59.— № 12.—P.2502-2507.
7. Bermesheva, E. V. New adhesive materials based on silicon-substituted polynorbornenes / E. V. Bermesheva, **D. A. Alentiev**, A. P. Moskalets, M. V. Bermeshev // Polymer Science, Series B. — 2019. — V. 61.—№ 3. — P. 314–322.
8. Guseva, M. A. The selective hydrosilylation of norbornadiene-2,5 by monohydrosiloxanes / M. A. Guseva, **D. A. Alentiev**, E. V. Bermesheva et al. // RSC advances. — 2019. — V. 9. —№ 57. — P. 33029–33037.
