

**Избранные публикации официального оппонента**  
**доктора химических наук Приходченко Петра Валерьевича**  
**по тематике защищаемой диссертации**

1. Medvedev A.G., Mikhaylov A.A., Shames A.I., Ilyukhin A.B., Churakov A.V., Grishanov D.A., Mel'nik E.A., Tripol'skaya T.A., Lev O., Prihodchenko P.V. Identification of Barium Hydroxo-Hydroperoxostannate Precursor for Low-Temperature Formation of Perovskite Barium Stannate // *Inorganic Chemistry*. 2020. – Vol. 59(24). – P. 18358-18365.
2. Lakshmi V., Mikhaylov A.A., Medvedev A.G., Zhang C., Ramireddy T., Rahman M.M., Cizek P., Golberg D., Chen Y., Lev O., Prihodchenko P.V., Glushenkov A.M. Probing electrochemical reactivity in an  $Sb_2S_3$ -containing potassium-ion battery anode: Observation of an increased capacity // *Journal of Materials Chemistry A*. – 2020. – Vol. 8(22). – P.11424-11434.
3. Mikhaylov A.A., Medvedev A.G., Grishanov D.A., Edison E., Srinivasan M., Sladkevich S., Gun J., Prihodchenko P.V., Lev O. Green Synthesis of a Nanocrystalline Tin Disulfide-Reduced Graphene Oxide Anode from Ammonium Peroxostannate: a Highly Stable Sodium-Ion Battery Anode. // *ACS Sustainable Chemistry and Engineering*. – 2020. – Vol. 8(14). – P. 5485-5494.
4. Shames A.I., Lev O., Mikhaylov A.A., Medvedev A.G., Gun, J., Prihodchenko P.V. Unusual Stabilization of Zinc Peroxide by Manganese Oxide: Mechanistic Understanding by Temperature-Dependent EPR Studies // *Journal of Physical Chemistry C*. – 2019. – Vol. 123(134). – P. 20884-20892.
5. Grishanov D.A., Churakov A.V., Medvedev A.G., Mikhaylov A.A., Lev O., Prihodchenko P.V. Crystalline Ammonium Peroxogermanate as a Waste-Free, Fully Recyclable Versatile Precursor for Germanium Compounds // *Inorganic Chemistry*. – 2019. – Vol. 58(3). – P. 1905–1911.
6. Mikhaylov A.A., Medvedev A.G., Grishanov D.A., Sladkevich S., Xu Z.J., Sakharov K.A., Prihodchenko P.V., Lev O. Doubly Coated, Organic-Inorganic Paraffin Phase Change Materials: Zinc Oxide Coating of Hermetically Encapsulated Paraffins // *Advanced Materials Interfaces*. – Vol. 6(12). – № 1900368.
7. Grishanov D.A., Mikhaylov A.A., Medvedev A.G., Gun J., Prihodchenko P.V., Nagasubramanian A., Madhavi S., Lev. O. Graphene oxide-supported  $\beta$ -tin telluride composite for sodium- and lithium-ion battery anodes // *Energy Technology* – 2017. – Vol. 6. – P. 127-133.
8. Grishanov D.A., Mikhaylov A.A., Medvedev A.G., Gun J., Nagasubramanian A., Madhavi S., Lev O., Prihodchenko P.V. Synthesis of high volumetric capacity graphene oxide-supported tellurantimony Na- and Li-ion battery anodes by hydrogen peroxide sol gel processing. // *J. Colloid Interface Sciences*. – 2018. – Vol. 512. – P. 165-171.
9. Lakshmi V., Chen Y., Mikhaylov A.A., Medvedev A.G., Sultana I., Rahman M.M., Lev O., Prihodchenko P.V., Glushenkov A.M. Nanocrystalline  $SnS_2$  coated onto reduced graphene oxide: demonstrating the feasibility of a non-graphitic anode with sulfide chemistry for potassium-ion batteries // *Chemical Communications*. – 2017. – Vol. 53 – P. 8272-8275.
10. Medvedev A.G., Mikhaylov A.A., Grishanov D.A., Yu D.Y.W., Gun J., Sladkevich S., Lev O., Prihodchenko P.V.  $GeO_2$  thin film deposition on graphene oxide by the hydrogen peroxide route: Evaluation for lithium-ion battery anode. // *ACS Applied Materials and Interfaces*. – 2017. – Vol. 9(10). – P. 9152-9160.
