по тематике защищаемой диссертации

1. Using hypercrosslinked polystyrene for the multicomponent solid-phase extraction of residues of 63 veterinary preparations in their determination in chicken meat by high-performance liquid chromatography–tandem mass spectrometry / A.O. Melekhin [и др.] // Journal of Analytical Chemistry. – 2021. – Vol. 76. – № 8. – P. 946-959.

2. Microextraction by packed sorbent optimized by statistical design of experiment as an approach to increase the sensitivity and selectivity of HPLC-UV determination of parabens in cosmetics / Z.B. Khesina [и др.] // Journal of Pharmaceutical and Biomedical Analysis. – 2021. – Vol. 195. – P. 113843.

3. Influence of the porous structure and functionality of the MIL type metal-organic frameworks and carbon matrices on the adsorption of 2,4-dichlorophenoxyacetic acid / V.I. Isaeva [и др.] // Russian Chemical Bulletin. – 2021. – Vol. 70. – № 1. – P. 67-74.

4. Composite materials based on polyvinylpyrrolidone and calcium phosphates for medicine / I.V. Fadeeva [и др.] // Inorganic Materials: Applied Research. – 2021. – Vol. 12. – № 4. – P. 1060-1065.

5. Пористые материалы на основе полилактида: получение, особенности гидролитической деструкции и области применения / Е.С. Трофимчук [и др.] // Высокомолекулярные Соединения. Серия С. – 2021. – Т. 63. – № 2.

6. Porous polylactide prepared by the delocalized crazing as a template for nanocomposite materials / E.S. Trofimchuk [и др.] // Mendeleev Communications. – 2020. – Vol. 30. – № 2. – P. 171-173.

7. Modification of the hypercrosslinked polystyrene surface. New approaches to the synthesis of polymer-stabilized catalysts / A.A. Stepacheva [и др.] // Russian Chemical Bulletin. – 2020. – Vol. 69. – № 4. – P. 721-730.

8. Pautova A.K. Microextraction of aromatic microbial metabolites by packed hypercrosslinked polystyrene from blood serum / A.K. Pautova, P.D. Sobolev, A.I. Revelsky // Journal of Pharmaceutical and Biomedical Analysis. – 2020. – Vol. 177. – P. 112883.

9. Preconcentration of catecholamins on hypercrosslinked polystyrene and their determination by high-performance liquid chromatography / V.V. Tolmacheva [и др.] // Journal of Analytical Chemistry. – 2019. – Vol. 74. – № 11. – P. 1057-1063.

10. Pautova A.K. Analysis of phenylcarboxylic acid-type microbial metabolites by microextraction by packed sorbent from blood serum followed by GC–MS detection / A.K. Pautova, P.D. Sobolev, A.I. Revelsky // Clinical Mass Spectrometry. – 2019. – Т. 14. – № A. – С. 46-53.

11. Friedel-crafts synthesis of new porous aromatic frameworks for stabilizing gas transport properties of highly permeable glassy polymers / L.A. Kulikov [и др.] // Russian Journal of Applied Chemistry. – 2019. – Vol. 92. – № 2. – P. 199-207.

12. Adsorption of catecholamines from their aqueous solutions on hypercrosslinked polystyrene / V.V. Tolmacheva [и др.] // Reactive and Functional Polymers. – 2018. – Vol. 131. – P. 56-63.

13. Tikhomirova T.I. Effect of nature and structure of synthetic anionic food dyes on their sorption onto different sorbents: Peculiarities and prospects / T.I. Tikhomirova, G.R. Ramazanova, V.V. Apyari // Microchemical Journal. – 2018. – Vol. 143. – Effect of nature and structure of synthetic anionic food dyes on their sorption onto different sorbents. – P. 305-311.

14. Application of hypercrosslinked polystyrenes to the preconcentration and separation of organic compounds and ions of elements / S.G. Dmitrienko [и др.] // Journal of Analytical Chemistry. – 2018. – Vol. 73. – № 11. – P. 1053-1063.

15. Sobolev P.D. Microextraction of aromatic microbial metabolites by packed sorbent (MEPS) from model solutions followed by gas chromatography/Mass Spectrometry Analysis of Their Silyl Derivatives / P.D. Sobolev, A.K. Pautova, A.I. Revelsky // Journal of Analytical Chemistry. – 2017. – Т. 72. – № 14. – С. 1426-1433.

16. A novel hybrid material based on polytrimethylsilylpropyne and hypercrosslinked polystyrene for membrane gas separation and thermopervaporation / G.S. Golubev [и др.] // Petroleum Chemistry. – 2017. – Vol. 57. – № 6. – P. 498-510.
