Файнгольда Евгения Ефимовича

кандидата химических наук, ведущего научного сотрудника отдела полимеров и композиционных материалов Федерального исследовательского центра проблем химической физики и медицинской химии Российской академии наук.

1. Ethylene/propylene copolymerization and their terpolymerization with 5-ethylidene-2-norbornene over catalytic systems based on half-sandwich titanium complexes with organoaluminum and organoboron activators / E. E. Faingol'd, S. L. Saratovskikh, S. A. Zhukov et al. // Petroleum Chemistry. — 2024.
2. Influence of reaction conditions on catalytic properties of rac-Et(2-MeInd)₂ZrMe₂/2,6-^tBu₂PhO-)AlⁱBu₂ in ethylene-propylene copolymerization / E. Faingol'd, S. Saratovskikh, A. Panin et al. // Polyolefins Journal. — 2023. — Vol. 10, no. 4. — P. 205–210.
3. Kinetics of selective trimerization of ethylene to 1-hexene over chromium-based catalysts / E. E. Faingol'd, N. N. Lashmanov, S. L. Saratovskikh et al. // Petroleum Chemistry. — 2023. — Vol. 63, no. 11. — P. 1335–1352.
4. Synthesis and properties of ethylene/propylene and ethylene/propylene/5-ethylidene-2-norbornene copolymers obtained on rac-Et(2-MeInd)₂ZrMe₂/isobutylaluminium aryloxide catalytic systems / E. E. Faingol'd, S. L. Saratovskikh, A. N. Panin et al. // Polymers. — 2023. — Vol. 15, no. 3. — P. 487.
5. Catalysts for synthesis of ethylene-propylene-diene rubbers / N. M. Bravaya, E. E. Faingol'd, E. A. Sanginov, E. R. Badamshina // Encyclopedia. — 2022. — P. 26640.
6. Homogeneous group IVb catalysts of new generations for synthesis of ethylene-propylene-diene rubbers: A mini-review / N. M. Bravaya, E. E. Faingol'd,

- E. A. Sanginov, E. R. Badamshina // Catalysts. — 2022. — Vol. 12, no. 7. — P. 704.
7. Ethylene/propylene and ethylene/propylene/5-ethylidene-2-norbornene copolymerizations on metallocene/(2,6-tBu₂PhO-)Al_iBu₂ catalyst systems / E. E. Faingol'd, S. L. Saratovskikh, A. N. Panin et al. // Polymer. — 2021. — Vol. 220. — P. 123559.
8. Advances in synthesis of ethylene–propylene–diene elastomers by ion-coordination polymerization on single-site catalytic systems of new generation / N. M. Bravaya, E. E. Faingol'd, E. R. Badamshina, E. A. Sanginov // Polymer Science - Series C. — 2020. — Vol. 62, no. 1. — P. 1–16.
9. Isobutylaluminum aryloxides as metallocene activators in homo- and copolymerization of olefins / E. E. Faingol'd, N. M. Bravaya, A. N. Panin et al. // Journal of Applied Polymer Science. — 2016. — Vol. 133, no. 14.
10. Isobutylalumoxanes as high-performance activators of rac-*et*(2-meind)₂ZrMe₂ in copolymerization of ethylene with propylene and ternary copolymerization of ethylene, propylene, and 5-ethylidene-2-norbornene / N. M. Bravaya, A. N. Panin, E. E. Faingol'd et al. // Polymer Bulletin. — 2016. — Vol. 73, no. 2. — P. 473–491.
11. Mechanochemical synthesis of triphenylmethylium and triphenylcyclopropenylium tetrakis(pentafluorophenyl)borates / V. D. Makhaev, A. N. Galiullin, E. E. Faingol'd et al. // Russian Chemical Bulletin. — 2014. — Vol. 63, no. 3. — P. 651–656.
12. Effect of trimethylaluminum on the polymerization of ethylene with the catalytic system bis[n-(3,5-di-*tert*-butylsalicylidene)-2,3,5,6-tetrafluoroanilinato]titanium(IV) dichloride-methylaluminoxane / N. M. Bravaya, E. E. Faingol'd, A. N. Panin et al. // Polymer Science, Series B. — 2010. — Vol. 52, no. 11. — P. 629–636.
