

Избранные публикации официального оппонента  
доктора химических наук  
**Кузнецова Александра Алексеевича**

по тематике защищаемой диссертации

1. Gilman A.B., Piskarev M.S., Kuznetsov A.A. Modification of polyether ether ketone by low-temperature plasma and ion implantation method for use in medicine and biology. //Russian Chemical Bulletin. - 2020. - V. 69(8). - P. 1409-1415.
2. Piskarev M.S., Skryleva E.A., Senatulin B.R., Gilman A.B., Kuznetsov A.A. Thickness of the Modified Layer of Poly(ethylene terephthalate) Film Treated by Direct-Current.// High Energy Chemistry. - 2020. - V. 54(4). - P. 299-301.
3. Syrsova D.A., Piskarev M.S., Zinoviev A.V., Kuznetsov A.A., Teplyakov V. V. Reagent-free modification of poly(vinyltrimethylsilane) membranes with low-temperature plasma to improve gas separation properties. // Russian Chemical Bulletin. - 2020. - V. 69(4). - P. 819-821.
4. Kuznetsov A.A., Tsegelskaya A.Yu., Orlova A.M., Belo N.A., Chirkov S.V., Nikiforov R.Yu., Alentiev A.Yu. Polyimides Based on the Diethyltoluenediamine Isomer Mixture: Synthesis and Gas Transport Properties.// Membranes And Membrane Technologies. - 2019. - V. 1(5). - P. 316-322.
5. Soldatova A.E., Tsegelskaya A.Yu., Semenova G.K., Abramov, I. G. Kuznetsov, A.A. Synthesis of tetrafunctional aromatic amines and star-shaped oligoimides using the B<sub>4</sub>+AB scheme.// Russian Chemical Bulletin. - 2018. - V. 67(11). - P. 2152-2154.
6. Soldatova A.E., Tsegelskaya A.Yu., Semenova G.K., Kurkin T.S., Dmitryakov P.V., Belousov S.I., Kuznetsov A.A. One-pot synthesis of semicrystalline polyamide-imide based on 4,4'-diaminobenzanilide and 2,2-propylidene-bis(1,4-phenyleneoxy) diphthalic anhydride in molten benzoic acid. // High Performance Polymers. – 2018. – V. 31(1). – P. 63-71.
7. Пискарев М.С., Гильман А.Б., Кечекьян А.С., Кузнецов А.А. Адгезионные свойства пленок полипиромеллитимида, модифицированных в разряде постоянного тока.// Клеи. Герметики. Технологии. – 2018. – V. 17(1). – P. 16-19.
8. Gilman A.B., Kuznetsov A.A., Ozerin A.N. Modification of ultra-high-molecular-weight polyethylene fibers and powders using low-temperature plasma.// Russian Chemical Bulletin. - 2017. - V. 66(4). - P. 577-586.

9. Piskarev M. S., Gilman A. B., Gaidar A. I., Kuznetsov A. A. Direct-Current Discharge-Induced Changes in Surface Morphology of Polyethersulfone Films. // High Energy Chemistry. – 2017. – V. 50(1). – P. 70-71.
10. Gilman A. B., Piskarev M. S., Kuznetsov A.A., Ozerin A.N. Modification of Ultrahigh-Molecular-Weight Polyethylene by Low-Temperature Plasma (Review). // High Energy Chemistry. – 2017. – V. 51(2). – P.136-144.
